17 Rue de Bretagne, 98835 Dumbéa, Nouvelle-Calédonie
Né le 23 septembre 1982 (35 ans) à Nouméa, Nouvelle-Calédonie

I am a dedicated computer science student with a strong proficiency in Python, eager to build a robust skill set in Data Science and Artificial Intelligence. My career goal is to acquire in-depth knowledge and practical experience in these fields, applying Python programming as my foundation. I am committed to continuous learning and am excited to contribute my growing expertise to help organizations harness the power of data and AI for impactful solutions.

EDUCATION

Sep. 2020 - Mar. 2024	BSc. in Computer Science at La Sapienza University.
Sep. 2015 - Jun. 2020	IT and Telecomunication High School diploma at IIS Einstein-Bachelet.

COMPÉTENCES

Language de programmation	Java (**JEE**, **JSE**, JME, Java Card Platform), Microsoft .Net (**C#**), **Typescript**, Javascript

PROJECTS

BRAIN CANCER SEGMENTATION AND CLASSIFICATION   APR. 2023 - OCT. 2023

github.com/davidebelcastro-sig/BrainCancerSegmentation-Classification   **Maker Faire 2023**

This project aims to use machine learning and AI to segment and classify brain tumors. It includes a user-friendly GUI for uploading and visualizing images, leveraging various libraries for its implementation. The tool provides segmentation results, including tumor probability and area, and classifies tumors into glioma, meningioma, or pituitary categories.

JARVIS   2013 - 2018

github.com/struggling-student/Jarvis

Jarvis is a tool made with Selenium and Python that has the ability to answer questions of a Quiz on the Moodle website. If there are any new questions, Jarvis is able to download them and store them for use in a new quiz.

Python | Selenium | OpenCV | Scikit-Learn | Pillow

WASAPHOTO   OCT. 2022- JAN. 2023

github.com/struggling-student/WASAPhoto

Keep in touch with your friends by sharing photos of special moments, thanks to WASAPhoto! Directly from your PC, you can upload your photos, and they will be visible to everyone who is following you.
