Software Engineer in Test specializing in *Embedded Systems Testing*, with a **Computer Science** degree. Committed to **continuous learning** and passionate about **driving innovation**. Dedicated to integrating *modern* and *emerging solutions* to improve system performance, reliability, and efficiency.

EXPERIENCE

ELT Group
Jan. 2024 - Present

Software Development Engineer in Test, ROME, Italy

- Document and implement *Test Plans* and *Test Cases* ensuring compliance with **MIL-STD-498** and **DO-178C** standards.
- Design and execute Automated Test Frameworks for **Embedded Software** in **Sensor Systems**, using a **Python/C++/Robot Framework** stack.
- Develop CI/CD pipelines using **GitLab**, **Docker** and **Kubernetes** to simplify the testing process and improve software delivery efficiency.
- Collaborate with **Cross Functional Teams** (*Software, Firmware, QA*) to validate software hardware integration and compliance with stringent *Defense Standards*.
- Create **Reusable Test Suites** for *Electronic Warfare Systems*, enabling the use of consistent testing procedures and approaches across different product specializations.

EDUCATION

Oct. 2024 - Present

M.Sc. in Computer Science at La Sapienza with a curriculum in **Systems** and **Networking**.

Oct. 2020 - Mar. 2024

B.Sc. in Computer Science at La Sapienza with a Thesis in **Machine Learning**.

github.com/LucianCrainic/bsc-thesis/

SKILLS

Programming Languages

Python, C++, Bash.

Libraries & Frameworks

Robot Framework, NumPy, Pandas, OpenCV, Scikit-Learn, PyTorch, Boost.

DevOps & Automation

Git, GitLab CI/CD, Docker, Kubernetes, YAML.

Requirements & Project Tools

Jira, IBM Doors, PTC Windchill.

Testing

Test Automation, Unit & Integration Testing, Model-Based Testing, Self-Healing Tests, Coverage Analysis

PROJECTS

Robot Framework

github.com/https://github.com/robotframework/robotframework www.robotframework.org

An Open Source **automation framework** for *Acceptance Testing* and *Robotic Process Automation* (RPA). It uses a keyword driven approach, allowing for easy test case creation and execution. The framework is extensible with libraries implemented in Python or Java, making it suitable for various testing needs. Active as a *contributor* to the project, improving its capabilities and features. Participated to the *Robot Framework Robocon 2025* in Helsinki, Finland representing ELT Group.

Python Automation Framework RPA Acceptance Testing

Jarvis : Personal Moodle Exam Assistant

github.com/struggling-student/Jarvis

An **automated tool** developed using Python and Selenium, designed to answer questions on the *Moodle platform*. The tool can identify and answer questions that it has previously encountered. If it encounters new questions during a quiz, it has the capability to download and store them for future use. This ensures that over time, it becomes more knowledgeable about the questions in the quizzes.

Python Selenium OpenCV Scikit-Learn Pillow

Tiny-ViT : Lightweight Vision Transformer for Efficient Image Recognition

github.com/struggling-student/Tiny-ViT

Developed a compact **Vision Transformer (ViT)** model optimized for efficiency, balancing performance and computational cost. Implemented and trained Tiny-ViT for *image classification tasks*, leveraging model pruning and quantization techniques to enhance deployment on edge devices.

Computer Vision Deep Learning PyTorch TensorFlow Scikit-Learn

ABOUT ME

- **Languages** : Italian (Mother Tongue), English (C1), Romanian (Mother Tongue).
- **Interests** : Sports (Running, Cycling, Trekking), Nature and Urban Photography.
